Dear M(r/s). Employer,

I am excited about the opportunity to work for your organization as a teacher. I found the job through a friend who said you were looking for mathematics educators. I would be a great selection for this position, given my experience and practice in educational technology.

Mathematics is one of my greatest passions, and nothing brings me more joy than being able to spread the knowledge further. My work with digital education would serve the needs of your organization well. I am proud of the online lectures I have been able to synthesize for the use of students outside of the classroom. Most teachers only teach from 8 to 3, but with my digital resources, your students will have access to my instruction 24/7.

I am a person who greatly appreciates the subject area of mathematics, and supplying your students with someone who shows a passion for math will build their own passion for math. I am a person who has strict standards and does everything in my power to uphold them. This is good for coworkers and student behavior. I can be a great role model for many in your community.

Again, I am more than excited about teaching at your school, and I think that I would be a great fit. I would love to interview with you sometime soon, and I look forward to being in contact with you. Thank you for your time and consideration.

Sincerely,

Liam Neidig
